

COVID 19 SURGE PLAN

Ernakulam District

2020

DDMA ERNAKULAM

COVID 19 patient management action plan

Available facilities:

- 1. Telemedicine
- 2. OP consultation in clinics and hospitals
- 3. COVID care centres (undiagnosed, mild symptomatic patients during community spread)
- 4. In patient care in government and private hospitals 88 hospitals
- 5. FLTC Major district level FLTC ADLUX with 300 CIAL with 300 pax, Rajiv Gandhi Indore stadium with 240 capacity.
- 6. Block level FLTC: 15
- 7. Panchayath level FLTC
- 8. COVID hospitals Medical college, PVS, AIIMS community centre Njarakkal

Telemedicine workflow

Telemedicine consultation for people who are under quarantine - travellers and contacts of COVID 19 positive patients.

- All people under quarantine are contacted by healthcare workers on a daily basis.
- People under quarantine will contact healthcare professionals if they develop any symptoms.
- Health professionals will manage and prescribe medicines
- If further evaluation is needed, they will be directed to district telemedicine (20 doctors & working 24 x 7) and teleconsultation will be arranged
- They will contact through whatsapp call 3 hourly / 8 hourly / daily.
- If needed swab collection will be arranged (transportation)

Management of general patients

Note: General public may also use telemedicine system for consultation before going to hospital

At all health facilities

Healthcare worker should

Check for mask

Ensure hand sanitization

Checks travel / contact history

Check for respiratory symptoms / fever / loose stools / anosmia

Fast tracking of suspected patients to fever clinic

In fever clinic –

Patient is examined and if admission is needed, isolation is arranged and swab should be taken. If swab collection facility or isolation facility is not available, patient should be transported to nearest health facility where swab collection and isolation are available.

After swab collection

- ✓ Patient will be kept under isolation till results are out.
- ✓ If positive patient will be shifted to COVID facility

Surge Plotting and Preparedness in Ernakulam

The number of active cases in Ernakulam is following the shown trend.

The plot equation - $y = 6E-304e^{0.0159x}$

It can be denoted as simply as $y = ke^{cx}$

The prediction also has to be done based on a similar equation. It is correct to assume that the number of cases which might come in the future will follow a similar trajectory and similar equation.

Predictions

The growth prediction is based on the equation - $y = 29.619e^{0.9078x}$

The equation used is same, with different constants. $y=ke^{cx}$

The Predictions should be divided in Stages, for better understanding and planning. Hence the 7-stage prediction is the suitable model for the same.

7 - Stage Prediction Model

		Active Pa	atient			
	Trigger to	range		Mild	Moderate	Severe
Stages	next stage			Symptoms	Symptoms	symptoms
	(75% of					
	Max)	Min	Max	80% of Active	15% of active	5% of active
1	38	0	50	40	7.5	2.5
2	225	51	300	240	45	15
3	450	301	600	480	90	30
4	750	601	1000	800	150	50
5	1350	1001	1800	1440	270	90
6	4500	1801	6000	4800	900	300
7		6001	22500	18000	3375	1125

Based on the above Stage predictions, the planning for housing and treatment of the patients need to be done. This include treatment and care for all categories of the Patients (Mild, Moderate and Severe).

Plan for COVID 19 positive patients

Active patient load: 0-50 trigger point:0 active patients

All positive cases (mild, moderate, severe) are admitted at MCH Kalamassery

Active patient load :50- 300

Trigger point: When there are 38 active patients this system is activated
